Osprey... a passion for
action!

BOOT DÜSELDORF 2018

HALL/BOOTH: 10 G27

ABOUT US

For **32 years** Osprey has built an enviable reputation for creating RIBs that offer outstanding performance, unrivalled durability and exceptional handling. In fact many of the RIBs built at the beginning are still going strong. The comprehensive Osprey range encompasses a wide variety of models, any one of which will offer the best solution for an individual or business looking for a **quality, hand built** boat meeting their exact requirements.

The Osprey range of RIBs goes from **5.15m all the way up to 8.60m**, with options to suit leisure, diving, commercial or racing so whatever you're looking for, we've got it covered...

The unique warped '**V-hull**' of the Osprey range combined with the high grade materials used in the manufacturing process guarantees every Osprey owner a safe, enjoyable boating experience in a RIB that will stand up to the varying conditions. When compared to the more traditional deep 'V' designs of many RIBs, Osprey owners really do enjoy the best of both worlds with a RIB that provides excellent sea keeping ability whilst retaining great handling and returning **high performance** without the need for huge horsepower and large fuel bills!

Every Osprey RIB is manufactured in the UK, and can be designed to meet your **individual requirements**. Osprey have a wide range of consoles & seating options which along with high quality A-frames and other stainless accessories enable you to specify your RIB exactly as you want it.

RIB DESIGN

We design and manufacture a superior range of Rigid Inflatable Boats (RIBs) between **5.15m and 8.20m** which are fully custom built. Our boats are designed for high durability and stable gliding performance even in the rough waters of the North Sea. We recommend our boats especially for the experienced customers either for leisure or professional purposes.

We have the pleasure to present you a brand new Leisure line in the Osprey range. Osprey is already well known for his "**No nonsense, heavy duty**" RIBs for "the hard user" with a basic deck layout which is really popular for the sportive people, divers, fishers and rescue people.

But now Osprey has designed a new line-up with a **family friendly and luxury deck**. These new models of **6.8 or 8.0 meters** are based on the popular Vipermax-hull, but they have a practical and **spacious deck**, a **streamlined console** with tinted screen (Seasport), a **sundeck with integrated storage** at the bow, an engine well with a **comfortable bench** and

huge storage space.

It comes with 2 jockey seats as a standard, but other seating arrangements are possible as an option. In other words despite this new design of a familiar deck, it's still possible to make a custom built RIB with the colours and seats of your choice. The new **ViperMax Leisure** range is available in the Vipermax Leisure **6.8, 7.3 and 8.0**. Like most of the family-friendly RIBs, the standard-equipment of the Vipermax Leisure range is quite complete.

VIPERMAX LEISURE RANGE: 6.8 & 8.0

THE ULTIMATE COMPACT LEISURE RIB:

The Vipermax Leisure 6.8 and 8.0 are two highly capable seagoing vessels. It most certainly aren't boats that will break! It benefits from having one of the best hulls ever designed for a craft of this size and type. Its pedigree cannot be contested. They're functional and built for hard use at sea.

It has been the company's most popular series for many years now and the key to that success is its flexibility. Due to the lately made add-ons as the renewed Seasport console, sundeck cushions in front, integrated fuel tank, Jockey seats and allot of other standard equipment, the new Leisure range has become a real family lover. Nevertheless, thanks to the V-hull these models stay still the compact leisure RIB for the sportsmen among us. I'm sure any boat manufacturer would be proud to have such a great performer in their current stable.

VIPERMAX LEISURE 6.8

"It benefits from having one of the best hulls ever designed for a craft of this size and type"
